When ordering please specify Car Model and Body Type. Prices subject to change without notice.

OVERNIGHT visits—week-end trips—longer vacations—all demand the need of ample luggage space with insurance of comfort for all passengers. Through the tailored trunk set pictured below, along with those illustrated on the next three pages, we present a number of excellent solutions to this problem. Each trunk has every requisite of appearance, refinement, and durability demanded by those desiring quality luggage.

THE signpost—ditches—curves—the unlighted blockade of the road—all must be clearly seen in ample time to avoid danger. The sufficient and properly directed light from the Packard Lamps, illustrated here, gives that often desired extra margin as an aid and convenience to night driving.

FOR SAFETY AND CONVENIENCE

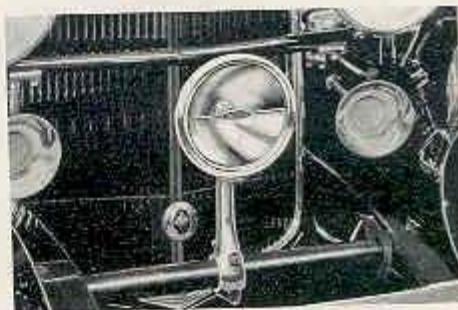

The Packard—Pilot-Ray Lamp

The Packard—Woodlites

The Packard—Lorraine Light

The Packard—Tripple Light

The Packard—Fender Lamp

ONE of the most attractive additions available for the Packard Eight. The lamps are miniature reproductions of the Packard Head Lamps.

BECAUSE safety, comfort and convenience are increased while nerve strain is greatly lessened, there is no accessory quite so valuable as a good light for night driving.

ALONG dark, strange or dangerous roads the Pilot-Ray throws a comforting and helpful beam, which is synchronized to turn right or left with the front wheels and is always ahead of the car, increasing visibility.

YOU may throw the bright concentrated beam of light from the Lorraine to any desired point, either at a great distance or close to the car. Controlled from within the car, it is exceedingly helpful in night driving.

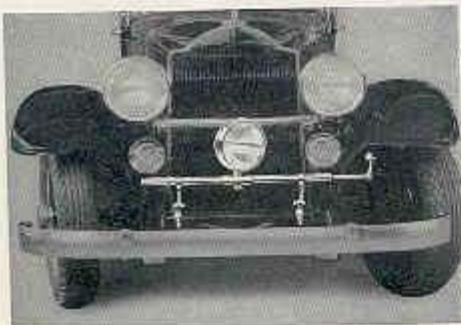

THE Packard Tripple Light remains in a fixed position but gives a bright beam of light for about 1000 feet ahead and spreads from ditch to ditch.

PACKARD Woodlites are practical in utility and their striking and novel design makes them a stunning addition to the car.

ALONG dark, strange or dangerous roads the Pilot-Ray throws a comforting and helpful beam, which is synchronized to turn right or left with the front wheels and is always ahead of the car, increasing visibility.

YOU may throw the bright concentrated beam of light from the Lorraine to any desired point, either at a great distance or close to the car. Controlled from within the car, it is exceedingly helpful in night driving.

THE Packard-Triple Light remains in a fixed position but gives a bright beam of light for about 1000 feet ahead and spreads from ditch to ditch.

PACKARD Woodlites are practical in utility and their striking and novel design makes them a stunning addition to the car.

Symbolic of the grace, speed, beauty and stability of Packard Cars, the beautiful De Luxe (above) and Pelican (below) Emblems are far removed from the conventional expressions of radiator emblems. Both are exclusive for Packard Cars.

PACKARD SEAT COVERS

Here is a convenient solution to the problem of how to keep the car's interior attractive regardless of the use to which it is put. Tailored specially for Packard, in exclusive patterns, their neatness gives a delightfully charming and colorful touch and they add measurably to utility and cleanliness.

Packard Sea-Breeze
Cushions

Are comfortable and cool even on the hottest days. Their pattern is a serviceable, closely woven fabric that may be sponged off, offering a protection against the soiling of clothes. So designed that they will cling wherever placed.

Rubber Mats Front and
Rear Compartments

Made from high-grade rubber specially compounded and treated to give wearing qualities, they offer an excellent and inexpensive protection against the wear, mud, water, etc., that the carpets are constantly subjected to.

Pillows and
Cushions

TAILORED to match either cloth or leather upholsteries or robes, these pillows and wedge-shaped cushions make a stunning and comfortable addition to your car.

Door Curtains

PRIVACY may be assured by these attractive silk door curtains which match the car's upholstery and are available for any enclosed Packard Car.

FINER TIRE COVERS

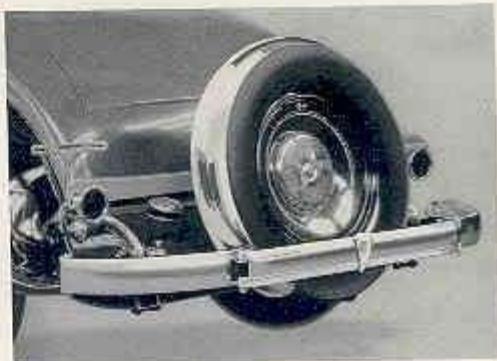

The extra-glazed, smooth, black sateen cloth cover pictured above may be had either in a spring or button type and with or without the Packard Emblem.

Tire Cover Protector

In these days of heavy traffic and crowded parking spaces the protection afforded by the Tire Cover Protector leads to both economy and preservation of appearance. It is shown in the upper right-hand picture. It is designed to blend with and installed so it is integral with the fender guard.

The graceful sweep of Packard Metal Tire Covers, finished to harmonize with the car's color or plated in chromium, adds a beauty otherwise unobtainable. Undeniably smart, they afford the finishing touch of motor car distinction that wins the instant acceptance of those who appreciate finer car appointments.

With open or light-colored closed cars the Burbank color is exceedingly attractive. Other cloth covers, lacquered to match any color, are available.

Tires and Tire Chains are available in all sizes. We invite your careful inspection.

Gear-Shift Ball
Horn Button
Cigar Lighter Cap

A most pleasing combination of a material that harmonizes with other interior fittings. These items complete the ensemble of the front compartment fittings.

Packard Step Plates

SUBSTANTIAL, ornamental and serviceable, they prevent the wearing of the running-board and aid in keeping the interior of the car clean. The mat is of long-wearing rubber moulded over a steel plate which prevents buckling.

Double Wheel Carrier

A SERVICEABLE and practical device for carrying two spare wheels and tires. Suitable for wood, wire, or steel wheels, it also has its advantages in appearance.

APPEARANCE COUNTS

Packard I-Sis Polish

A exceptional body polish that works equally well on varnished, lacquered or enameled surfaces. It is a glossing, polishing, and cleaning preparation giving satisfaction with minimum effort.

Packard Touch-Up Black

A high-grade black enamel with screw top bottle with a good brush soldered in the cap. Unequalled for quickly touching up rust spots or enameled parts.

Packard Fabric Cleaner

A non-explosive and non-inflammable liquid that quickly cleans the most delicate of fabrics or upholsteries without leaving ring or odor.

Packard Chromium Cleaner

It easily and quickly restores the high luster to chromium. Does not contain ingredients that will harm or remove the plating.

Packard Chassis Lubricator Oil

Every point on the chassis of your car are automatically lubricated through the chassis oiling system. The tank from which the oil is fed holds enough for about 2500 miles of driving. It should be refilled when its gauge shows empty. Packard Chassis Oil is made to factory specifications and its properties are exactly correct for its purpose. Don't use any other lubricant—it may clog or gum the device.

Packard Top Dressing

A quick-drying material that leaves a durable rich finish on any black covering. It improves the appearance and water-proofs the top, adding to its useful service.

Packard Tar Remover

Quickly removes tar, oil, and dirt without harming the finish of the car. Also for cleaning running gears, chassis, wheels and fenders.

Anti-Freeze Solution

A necessity in cold weather, it prevents freezing of water in the cooling system to 15° below zero. The boiling point closely approaches that of water.
