Subject: SUPER EIGHT LONG WHEELBASE SEDANS - MODEL 2126

Recently we reduced the over-all height of these cars approximately 1/2 inch by changing the standard tire size from 7:50 x 16 to 7:00 x 16. With this change in tire size it is necessary to increase by two pounds the tire pressure. The recommended tire pressures are as follows:

7:50 x 16 tire - 30 pounds front - 30 pounds rear (cold)  
7:00 x 16 tire - 32 pounds front - 32 pounds rear (cold)

The change in tire size also necessitated a change in speedometer drive pinions. The correct pinions used in these cars are as follows:

<u>Tire Size</u>	<u>Transmission</u>	<u>Pinion Teeth</u>	<u>Part No.</u>
7:50 x 16	Overdrive	17	354976
7:50 x 16	Standard	16	367650
7:00 x 16	Overdrive	18	347356
7:00 x 16	Standard	17	354976

Very truly yours,
